He received his degree in Zoology with the distinction of first standing in the merit ranking, and received the gold medal. He made his research doctorate from Meerut University under the guidance of eminent zoologist, the late Dr. M.L. Bhatia, professor of zoology, university of Delhi. [Required quote] Rastogi had been a member of the "Zoology Academy" [clarification required], [necessary quote] and was a member of the "Educational Evolution Committee", Neccert, New Delhi. [Necessary quote] He was a member of Zoology academic staff at Meerut College, Meerut (Uttar Pradesh) from 1961 to 1967. He wrote books for over five decades. À Author of biology books for aspirants ISCS, CBSE as well as more status cards. The books on the cytology, genetics, ecology and evolutionary biology are very popular at a university level throughout India. [1] [2] She was awarded the author distinguished of the year in 2012 given by the Federation of Educational Editors in Delhi, India for her brilliant work. Fundamentals of molecular biology is an important rastogi work. [3] Recently, the textbook of her for 11 À ° degree obtained selected for Bhutan's national textbooks. Condition: Very good. Zubays Biochemical Principles This book is in excellent condition and can be sent within 24 hours of order. The lid can have some signs of limited wear but the pages are clean, intact and the spine remains intact. This book was clearly well maintained and cured so far. Guarantee of refund if you are not satisfied. See all our books here, the order more than 1 book and bookstore | . Soft cover. Condition: New. 1st edition. Content: Preface. 1. Introduction to molecular biology. 2. The chemical bases of life: atoms and molecules. 3. The molecules of life: biomolecules. 4. Methods used to study macromolecules. 5. Identification of genetic material. 6. Desoxyribonucleic acid (DNA). 7. Genome organization. 8. DNA replication. 9. DNA Repair. 10. Ribonucleic acid. 11. RNA transcription and processing. 12. Genetic code. 13. Protein synthesis. 14. Gene: his expression in Procaidi e 15. Adjustment of the gene expression or regulation of protein synthesis. Regulation 16. of the gene expression in eukaryotes. Genetic engineering 17. Or recombinant DNA technology. Glossary. Index. The accounting principles of molecular biology was designed according to the recognition and post-universe course of different different of India. It gives a vast but short coverage of the fundamentals of molecular biology. Describes in polishing language the molecular passages that cells use to reduce and repair the expression of the DNA of genes, the process and translate information encoded in MRNA and regulate protein synthesis. Silent features: completely updated. latest information obtained from various sources. Simple and polished language. Simple, well labeled and immaculate illustrations. Introductory chapter on molecular biology. Chapter on methods to study macromolecules. Further information to reason various phenomena in boxes. Exhaustive glossary.
